Mental Math Strategies ...

By the end of grade one:

Students demonstrate an understanding of addition of numbers with answers to 20 and their corresponding subtraction facts, concretely (real objects), pictorially (pictures) and symbolically (numbers).

Materials:

Dominoes, dice (1 to 6 or 0 to 9), cards, 10 frame cards, rekenreks, addition and subtraction games and number lines.

www.edu.gov.mb.ca/k12/cur/math

Students are taught various strategies to recall basic facts. If children are using fingers, they are encouraged to think about which strategies could help find the answer.

Students are also encouraged to start from what they know. These strategies are stepping stones building on one another through the year.
